

## **System Pressure Advisory!**

The water consumers of the Town of Dallas, in Gaston County are experiencing periods of low pressure and outages in the distribution system due to a water main break. Crews are working to repair the line at this time, but periods of low or no pressure in the distribution system increases the potential for back siphonage and introduction of bacteria into the water system. **This is a precautionary effort to ensure the safety of all customers.**

Therefore, when the water service is restored, consumers are advised to **boil all water** used for human consumption (including drinking, making ice, brushing teeth, washing dishes and food preparation) or use bottled water.

Vigorous boiling for one (1) minute should kill any disease-causing organisms that may be present in the water.

Water customers are strongly urged to conserve water whenever possible. This advisory will remain in effect until further written notification is issued.
